

*Sub P*

We claim:

1. A decorative molding wrapping foil comprising at least one hot transfer inked foil carried on a carrier, said at least one said hot transfer inked foil laminated onto a planar wrapping foil thereby creating a laminated wrapping foil wherein said laminated wrapping foil is wound upon a roll for use in foil wrapping of a substrate for use as picture frame element or building trim piece.
2. A decorative molding foil as in claim 1 wherein said laminated wrapping foil has said carrier stripped therefrom, said laminated wrapping foil thereby becoming an intermediate layered foil, layering at least one other hot transfer foil onto said intermediate layered foil thereby creating a laminated wrapping foil wherein said laminated wrapping foil is wound upon a roll for use in foil wrapping of a substrate for use as picture frame element or building trim piece.
3. A decorative molding foil as in claim 2 wherein said laminated wrapping foil has said carrier stripped therefrom for application to a substrate, said laminated wrapping foil having an adhesive applied to a side of said layered wrapping foil opposite said one other hot transfer foil, said laminated wrapping foil wrapped about a substrate to be decorated.
4. A decorative molding foil as in claim 1 wherein said laminated wrapping foil has said carrier stripped therefrom for application to a substrate, said laminated wrapping foil having an adhesive applied to a side of said layered wrapping foil opposite said hot transfer foil, said laminated wrapping foil wrapped about a substrate to be decorated.
5. A decorative molding foil as in claim 1 wherein said at least one said hot transfer inked foil is a translucent hot transfer foil.
6. A decorative molding foil as in claim 1 wherein said at least one said hot transfer inked foil is an opaque hot transfer foil.
7. A decorative molding foil as in claim 2 wherein said at least one said hot transfer inked foil is an opaque hot transfer foil.
8. A decorative molding foil as in claim 7 wherein said at least one said other said hot transfer inked foil is a translucent hot transfer foil.

9. A decorative molding foil as in claim 2 wherein said at least one said hot transfer inked foil is a translucent hot transfer foil.

10. A decorative molding foil as in claim 9 wherein said at least one said other said hot transfer inked foil is a translucent hot transfer foil.

5 11. A decorative molding wrapping foil comprising at least one hot transfer inked foil carried on a carrier, said at least one said hot transfer inked foil laminated onto an embossed wrapping foil thereby creating a laminated embossed wrapping foil wherein said embossed laminated wrapping foil is wound upon a roll for use in foil wrapping of a substrate for use as picture frame element or building trim piece.

10 12. A decorative molding foil as in claim 11 wherein said embossed laminated wrapping foil has said carrier stripped therefrom, said embossed laminated wrapping foil thereby becoming an intermediate embossed layered foil, layering at least one other hot transfer foil onto said intermediate embossed layered foil thereby creating a laminated embossed wrapping foil wherein said laminated embossed wrapping foil is wound upon a roll for use in foil wrapping of a substrate for use as picture frame element or building trim piece.

15 13. A decorative molding foil as in claim 12 wherein said laminated embossed wrapping foil has said carrier stripped therefrom for application to a substrate, said laminated embossed wrapping foil having an adhesive applied to a side of said laminated embossed wrapping foil opposite said one other hot transfer foil, said laminated embossed wrapping foil wrapped about a substrate to be decorated.

20 14. A decorative molding foil as in claim 11 wherein said laminated embossed wrapping foil has said carrier stripped therefrom for application to a substrate, said laminated embossed wrapping foil having an adhesive applied to a side of said laminated wrapping foil opposite said hot transfer foil, said laminated embossed wrapping foil wrapped about a substrate to be decorated.

25 15. A decorative molding foil as in claim 11 wherein said at least one said hot transfer inked foil is an opaque hot transfer foil.

16. A decorative molding foil as in claim 11 wherein said at least one said hot

transfer inked foil is a metallic hot transfer foil.

5 17. A decorative molding foil as in claim 11 wherein said at least one said hot transfer inked foil is a translucent hot transfer foil.

18. A decorative molding foil as in claim 12 wherein said at least one said hot transfer inked foil is an opaque colored hot transfer foil.

19. A decorative molding foil as in claim 12 wherein said at least one said other hot transfer inked foil is a metallic hot transfer foil.

10 20. A decorative molding wrapping foil comprising at least one hot transfer inked foil carried on a carrier, said at least one said hot transfer inked foil having a portion of the ink thereon removed prior to being laminated onto a planar wrapping foil thereby creating a laminated wrapping foil having portions of the base color of said planar wrapping foil showing therethrough wherein said laminated wrapping foil is wound upon a roll for use in foil wrapping of a substrate for use as picture frame element or building trim piece.
